Attendance Policy - Quick Guide for Parents and Carers

We expect pupils to attend school **95%** of the academic year. Children who have a **lower than 95%** attendance will not make as much progress as those children who remain above 95% attendance.

Lower than 95% attendance not only affects academic outcomes it also affects friendships and social development. As a school we are here to help families with attendance and have many different supports available to help, please do talk to us about how we can help you.

How can I support my child's attendance and punctuality?

- Ensure your child arrives early or on time for school every day and is ready to learn. Arriving after registration is recorded as an unauthorised absence. Pupils must be in class/form time ready to be registered by **8.45am** Infants and **8.50am** Juniors.
- If your child appears to be only slightly unwell, send them in to school. We have staff who will contact you if their condition deteriorates [see NHS guidance overleaf]
- Book any medical appointments outside of school hours. If this is unavoidable, please book for as late in the afternoon as possible and inform the school of appointments in advance.
- Supply a copy of the appointment card or hospital letter if your child has an appointment during school hours.

What should I do if my child is not 'fit' to go into school?

'On the day' of every absence:
On **each day** your child is unfit to come to school, please report this absence using the school telephone line to let us know. In the message you must leave your child's full name, class and give the specific reason for absence. The information you give will be recorded on our official register.

Leave of Absence

There may be exceptional circumstances where you need to request a leave of absence for your child. Please use our 'Leave of absence request' form to make these types of requests. The form should be submitted **at least two weeks** in advance of the leave of absence. You will receive a response to advise if the request has been approved or not approved. Please know that any term time holiday will not be approved and therefore be unauthorised absences.

What is the impact on my child of missing school? This is over the course of a whole year.

NHS guidance – To help you make the decision about sending your child to school.

Is my child too ill for school?

UK Government NHS

Does your child have a high temperature (38°C or more)? YES Keep them off school until it goes away. NO Follow the guidance below.

Your child can usually go to school with a mild cough or cold if they are otherwise well. If you do keep your child at home, it's important to phone the school or nursery on the first day and give them the reason.

Should go in	Should go in (let the school know)	Seek treatment before returning to school	Keep them off (at first)
A cough, cold or sore throat Fine with slight cough or common cold symptoms, such as a runny nose, sore throat or headache, as long as they're otherwise well and do not have a high temperature.	**Cold sores** Encourage them not to touch the blister or kiss anyone while they have the cold sore, or to share things like cups and towels.	**Impetigo** They'll need treatment from a pharmacist or GP, often with antibiotics. Keep them off school until all the sores have crusted over and healed, or for 48 hours after they start antibiotic treatment. Encourage your child to wash their hands regularly and not to share things like towels and cups with other children at school.	**Ear infection** If your child has an ear infection and a high temperature or severe earache, keep them off school until they're feeling better or their high temperature goes away.
Threadworms Speak to your pharmacist, who can recommend a treatment.	**Conjunctivitis** Fine unless they are feeling very unwell. Seek advice from your pharmacist. Encourage your child not to rub their eyes and to wash their hands regularly.	**Ringworm** See your pharmacist unless it's on their scalp, in which case you should see a GP. It's fine for your child to go to school once they have started treatment.	**Measles** They'll need to see a GP. Call the GP surgery before you go in, as measles can spread to others easily. Keep your child off school for at least 4 days from when the rash first appears. They should also avoid close contact with babies and anyone who is pregnant or has a weakened immune system.
	Head lice & nits You can treat head lice and nits without seeing a GP.	**Scarlet fever** They'll need treatment with antibiotics from a GP. Otherwise they'll be infectious for 2 to 3 weeks. Your child can go back to school 24 hours after starting antibiotics.	**Vomiting & diarrhoea** Stay away from school until they have not been sick or had diarrhoea due to illness for at least 2 days (48 hours).
	Hand, foot & mouth disease If they seem well enough to go to school, there's no need to keep them off. Encourage your child to throw away any used tissues straight away and to wash their hands regularly.	**Chickenpox** Keep them off school until all the spots have crusted over. This is usually about 5 days after the spots first appeared.	
	Slapped cheek syndrome Once the rash appears, they're no longer infectious. Let the school or teacher know if you think your child has slapped cheek syndrome.		

Feeling worried or anxious: It's normal for any of us to feel worried sometimes. We may get a tummy ache or headache, or have problems eating or sleeping. Avoiding school can sometimes make a child's worries about going to school worse. If your child is struggling, please speak to school as soon as possible to explore available help. If your child is still struggling and it's affecting their everyday life, you should contact GP or school nurse.

Let's work together to give every child the best chance in life.
