

Wednesday 1st February – Learning Option

Follow the Rainbow Learning Challenge

Here is a special challenge for you to complete if you want to on this day. Can you make your own rainbow using the nature around you?

Collect things in nature to represent the colours of the rainbow. You could create a poster showing these or create a sellotape bracelet where you can stick things on, or you could choose your own way to create a rainbow – be creative!

You could also spot any signs of spring if you are out and about.

Use the day to read your school book too, you could find the most unusual place to read!

School is open as normal on Thursday 2nd February.
